IT Professional with 8+ years experience working on projects in both Site Reliability and Software domain for a large scale internet company. Interested in developing systems which are reliable, easy to maintain and secure by design.

WORK EXPERIENCE

Yahoo - Senior Software Engineer (IC4) **07/2016 – 02/2025**

- Part of Identity team powering User Authentication serving multiple brands within Yahoo such as Mail , Finance , Sports, Techcrunch .
- Led multiple enhancements to authentication flows backend (Java) which includes rollout of Authenticator App (60% user conversion), Push-based second factor, recovery codes, and code delivery through popular messaging platforms—strengthening account security and usability.
- Involved in implementation of OAuth 2.0 Dynamic Client Registration (RFC 7591) for Yahoo's Identity SDK across mobile apps
- Developed resilience testing tool in Python simulating DNS, network, and host failures to assess production readiness of NoSQL systems
- Built and operated Splunk clusters, dashboards, and alerting with cloud + in-house python tools, improving visibility and reducing MTTR for critical systems.
- Built abuse protection at proxy level (Apache Traffic Server) using IP and client signature heuristics.
- Deputy Security PoC for the team—drove threat modeling and software composition analysis initiatives with Security team (TheParanoids)
- Participated in Weekly 12X7 On-call Schedule to actively troubleshoot and resolve production issues within SLA. Managed thousands of hosts serving few millions users during peak traffic.
- Performed OS and BIOS upgrades, managed packages using Chef and Ansible, and monitored systems for hardware failures
- Mentored, trained, and led engineers effectively on sprint tasks and cloud migrations.

Visual IQ - Intern **05/2015 – 06/2015**
Kochi,India

- Setup Monitoring using Redhat's PerformanceCoPilot (pcp.io) and visualized it using Netflix's Vector

EDUCATION

Cochin University of Science and Technology (Govt. Model Engineering College) **2012 - 2016**
Bachelor of Technology (Computer Science) Kochi, India

SKILLS & INTERESTS

- **Certifications :** Associate Cloud Engineer Certification Issued by Google Cloud **Link**
- **Skills :** Python, Java, Bash, Chef, Ansible, AWS, Cloud Migration
- **Interests :** Distributed Systems, Site Reliability Engineering, Security, Public Cloud, Devops
- **Activities :** Presented an external talk about the Resilience Testing Tool at LSPE (Large Scale Production Engineering) Meetup 35th Edition Dec 2020, Took technical sessions for peers as part of Tech Connect sessions held at Yahoo and also involved in training of newly hired college graduates.
